

Steel Bushed/Knuckle Chain

Steel Bushed/Knuckle Chains keep elevators and conveyors operating in adverse conditions. Built to last in demanding applications, they are found in a variety of elevators and conveyor systems.

Pins and knuckles are press fit into punched and shaved holes in the sidebars to reduce wear and to maintain dimensional accuracy. The robust construction makes Steel Bushed/Knuckle Chains ideal replacements for cast chains when conditions become too severe.

Pins are heat-treated alloy steel or case-hardened steel. Knuckles are case-hardened alloy steel. Sidebars are either heat-treated medium carbon or alloy steel. Straight and offset sidebar constructions are offered.

Engineering Class Steel Bushed/Knuckle Chain

Dimensions are in inches unless otherwise indicated.
